Acquisition of Microneedle and Syringe Business of Nanbu Plastics Co., Ltd.

To all valued customers and partners,

We, Unisis Corp. (hereunder called 'Unisis') hereby announce that we signed an agreement with Nanbu Plastics Co., Ltd. (hereunder called Nanbu Plastics) on April 18, 2018, regarding acquisition of manufacturing and marketing rights for Microneedle and Syringe Business (hereunder called 'the Business') from Nanbu Plastics. The Business includes the following four products.

- Disposable Atraumatic Microneedle (Triple tip type) "Paskin"
- Disposable Atraumatic Microneedle (Single tip type) "Pasny"
- Disposable Atraumatic Ophthalmic Microneedle
- Disposable Syringe (Low dead-space type)

Unisis schedules to sell above products starting from August 1, 2018.

We will closely work with Nanbu Plastics to complete smooth transition of the Business.

Unisis is a specialized manufacturer of specialty needles including disposable spinal anesthesia needles, epidural anesthesia needles and surgical puncture needles. We maintain capability to complete all phases of production/marketing, from design to manufacturing and obtaining regulatory approvals, by ourselves. We mainly sell our products to OEM customers and make over 80% of the total sales from exporting. And acquiring the Business will give us growth opportunities in the new global markets, such as plastic surgery, cosmetic surgery, dermatology and ophthalmology.

We believe that this opportunity will allow us to provide better products and services and hope to build stronger relationships with all of you.

If you have any inquiry about this subject, please contact:

Yuko Ito, General Manager of Sales Division
